When you're on the track, the last thing you want to worry about is the helmet on your head. The best motorcycle racing helmets provide optimal protection and protect your skull in an accident. Check out some of the best in our shopping guide below. Best Reviews and Recommendations for Motorcycle Racing Helmets 2020 Best Honorable Mention of Best Overall Value Why trust us All our reviews are based on market research, expert input or hands-on experience with most of the products we include. In this way, we offer genuine and accurate guides to help you find the best choices. Learn more Provide head protection. The best motorcycle helmet for racing was designed to do one thing and do it well: protect your head. If you don't wear the full face helmet on the track, you're preparing for injuries and even death. Racing helmets are much more effective than open face helmets and modular helmets. High quality. Helmet manufacturers spend a lot of time and money researching and designing their products to ensure they protect riders in an accident. The best motorcycle racing helmets can even lessen the effects of brain rotation. Know federal guidelines. The best motorcycle racing helmets meet or exceed federal safety standards. Many track and race organizers conduct technological inspections to ensure that the helmet you are wearing is safe. Make the races fun. Walking the track can be addictive, and the more protected you feel, the more fun you will have. Going to the track can improve your skills and make you a better driver. When you are wearing the proper helmet, you can loosen up and enjoy the ride. Bell was started by founder Roy Richter in a garage in 1954. The company creates Bell helmets for motorracing, motorcycling and cycling. Bell is headquartered in Santa Cruz, California, and one of its main products is the Bell Race Star Full-Face Motorcycle Helmet.AraiThe Japanese company Arai Helmet, Ltd. was founded in 1937. He began making military helmets in the 1930s, industrial helmets after World War II, and motorcycle helmets in the early 1950s. One of its most popular products is the Arai Corsair X Helmet - Nicky 7.ShoeiShoei Co., Ltd. is another Japanese company that manufactures motorsport helmets. He's been making protective helmets since 1958. Shoei designs helmets for various Grand Prix bikers. One helmet to consider is the Shoei X-Fourteen White Full Face Helmet.AGVItalian motorcycle helmet manufacturer AGV has been in business since 1947. He is known for making the first fiberglass. Several of his riders made history in motorcycle racing. Check out this AVG helmet for the daily race: AGV Unisex-Adult Full Face K-1 Motorcycle Helmets Pricing \$150-\$900: Expect to pay a lot for one racing helmet. It is a worthy investment because it will provide optimal protection in an accident. These helmets are designed to be light and aerodynamic and are made of high quality materials such as carbon fiber and kevlar. Main featuresVentilationThe best helmets will circulate through the air and provide maximum airflow when you are running. The best motorcycle racing helmets feature entrance and exhaust exits that you can easily open and close. Many are adjustable for comfort. The vents bring cold air when you need it and turn off when you don't need it. Field of ViewLook at the opening of the helmet. Some helmets have higher apertures than others, which can affect your field of view. For example, sports cyclists generally prefer a higher aperture, which compensates for the lower handlebars as well as their riding position. Many racing helmets are designed to provide optimal vertical and lateral visibility, so you see what's around you when you're on the track. FIAAlthough all these features are important, it is vital that you have a helmet that fits your head properly. If that doesn't work, it won't protect you very well. Some helmets have a break-in period, while others fit comfortably from the start. It's okay if a helmet is tight at first, because it will wear with time. A very large helmet and moves easily around your head can come out during an impact. Safety Official and professional races have a variety of safety requirements. If possible, focus on the latest helmets evaluated by the Snell Memorial Foundation, although many events allow helmets that are classified in the previous year. SA-rated helmets are professional-class and are often used in automatic racing. The m-rated helmets are designed for motorcycle racing. They have a wider field of view than SA helmets, but provide a lower level of protection. The k-rated helmets are for karting and have impact protection similar to SA helmets, but they are not as fire retardant. Experts recommend buying an M-rated helmet because they are versed and provide good protection. Other considerationsMaterial: Helmets are made of fiberglass, carbon fiber, kevlar or plastic injected into molds, which is the most common. Racing helmets are typically kevlar and carbon fiber, so they are very strong and absorb larger impacts. Fiberglass helmets are also designed to have impact and can withstand greater impact than plastic helmets. Liner: Some competitions have strict safety requirements, and you may need a helmet with a fire retardant inner coat to participate. Some brands make antimicrobial liners that prevent sweat and dirt from accumulate inside the helmet. Other liners are adjustable and/or removable for easy cleaning. Padding: Many helmets have pads that you can add or remove as needed. You need a comfortable fit so that your head does not bounce inside the helmet when you are riding. Adjust the cushions for comfort and fit, and make sure they are not too tight that cause discomfort. Face Shield: The best motorcycle motorcycle Helmets have facial shields that are easy to install and remove. It can be frustrating if it is difficult to remove the shield. Many helmets come with light visors, but you have the option to replace it with a colored shield, which can help with visibility. Best Motorcycle Racing Helmets Reviews & Recommendations 2020 Best Shoei X-Fourteen White Facial Facial Helmet Check Latest Price The X-Fourteen features six air inlets and six exhaust vents for ventilation. The max-dry 3D interior and adjustable liner provide a custom fit and allow for a wider field of view. The facial shield allows you to tear the racing tears, and is designed with a fog resistant system. The shell is strong, light and elastic. One of the great things about this helmet is that it is quiet, and there is very little noise on the road. There's no resistance to the wind, and it cuts the air well. It has excellent visibility and is comfortable. In addition, the anti-fog technology works very well, and the helmet is approved by DOT and Snell. The helmet comes in white, glossy black, and matte black. However, pinlock buttons may appear on the edge of your peripheral vision. Also, it's really for sports bikers because of the way it controls airflow. If you have a cruiser, you may want to consider other options. Also, the helmet may not be the same color as it is depicted in images. Best Value Shoei Hornet X2 Navigate Street Racing Motorcycle Helmet Check Latest Price The Shoei Hornet X2 Adventure helmet combines on-road and off-road performance. The spokesperson and chin bar provide a great air intake and ventilation, allowing riders to breathe hard and comfortably as they hit the track. The helmet comes in four shell sizes for a custom fit (small, medium, large and extra large), and the shell construction is lightweight, compact and aerodynamic. The facial shield is molded by 3D injection and provides a distortion-free view. It is quick and easy to remove the shield without removing the visor, and the liner includes foam in key areas around the head for better impact protection. The helmet fits tightly when riding at high speeds, and the 3D-shaped cheek pads come in various thicknesses, so you can create a custom fit. The DOT approved helmet also complies with the FMVSS 218 Standard.A problem with this helmet is that it can get very hot and sweaty in certain weather conditions. It may also not be as comfortable as some rival helmets, especially in warmer temperatures. Also, the helmet makes a little wind noise at highway speeds. Honorable Mention Arai Corsair X Helmet - Nicky 7 Check Latest Price The Corsair racing level is the main model of Arai, and is well known for its high quality attributes. It is designed to redirect the energy of instead of absorbing it through its Variable Axis System (VAS). It features an eco-pure antimicrobial lining and a VAS shield lock system that keeps the shield securely closed so it doesn't accidentally open. The air inlet vents are adjustable and can be half open, and fully open. They have a tight seal to prevent wind noise and water intrusion and are simple to operate even when you are wearing gloves. The VAS MAX Vision shield has a clear anti-fog insert. It is quick and easy to remove the facial shell and neckroll, and the helmet is approved by DOT and Snell.The biggest drawback with this helmet is that it is a little expensive. It can also be a little strange to lift the visor with gloves. Another problem is that the inner fabric is a bit rougher compared to some other models. Once you buy a helmet, make sure it fits. This is particularly important if you buy it online. Before removing the shield stickers, use it around the house for about 10 minutes. If it is not comfortable or too small or large, return it. Don't wear an expensive helmet for many, many years just because you've spent a lot of money on it. You need to replace the helmets regularly so that they provide optimal protection in an accident. Look at the helmet strap fastener. It is easier if the helmet has a simple fastener that prevents the loose end from hitting the wind. It should also be easy to use when you are wearing gloves. Some helmets are compatible with Bluetooth and speakers. If you like to listen to music when you pedal, find a helmet that is designed to accommodate a sound and/or communication system. A: You need a new helmet if your current one is over five years old, if it doesn't fit properly, or if it has had an impact in an accident. You also need to replace a helmet if it shows heavy wear and/or is in poor condition. Q: What is the best safety standard for the helmet? A: Most helmets are DOT/Snell or ECE certified. Cheaper helmets are only DOT certified. Ideally, you should wear a helmet that is Snell certified. Q: Are the more expensive helmets safer? A: More expensive helmets usually have higher quality inner coverings and tend to last much longer than cheap motorcycle helmets. More expensive helmets are often lighter and provide a fit that is a little more comfortable. Still, affordable helmets -- as well as expensive ones -- can be certified by DOT and Snell, which is proof of their safety. Final ThoughtsNosses most chosen for the best motorcycle racing helmet is the Shoei X-Fourteen White Full Face Helmet. It is available in three colors, is very comfortable, and is great for visibility. For a more economical option, consider the Shoei Hornet X2 Navigate Street Racing Motorcycle Helmet. MORE TO READ
